## Home comforts

The new model of the Actros impresses with even greater comfort for the driver. Thanks to a driver's cab that is 2.50 metres wide with a flat floor, it is exceptionally spacious. The Actros L also scores points with top-quality equipment that is tailored to drivers' needs. The optimised seat position offers further adjustment options and the new seat covers provide a pleasant ambience. The quality of the living conditions is immensely important. That's because only someone who is fully rested can successfully complete the longest journeys. The Actros L facilitates undisturbed rest with its improved noise insulation and turns the cab into the perfect comfort zone with its comfortable mattress and thicker, cosier topper.

## RoadEfficiency

Because the Actros L stands for intelligent vehicle use and sophisticated connectivity, it also comes with an all-round service. The Multimedia Cockpit also contributes towards optimised consumption and better planning thanks to the Mercedes-Benz Truck App Portal. At the same time Eco-Support and Euro VI can help you to drive more efficiently. And thanks to different programmes, from the well-proven Fleetboard to the Uptime analysis tool, the Actros L offers straightforward support for a range of very different needs.

## Radiant

On the outside the truck also gleams with radiant splendour thanks to striking paintwork and chrome-plated lettering. The innovative, optional LED headlights are also a very special highlight. Thanks to modern technology they provide more reliable light conditions and, with their outstanding brightness, increase safety in many different situations.
