> What is the offer?

Free NewMotion Home Fast Smart charge point, worth £549*

The NewMotion Home Fast Smart charge point offers safe and convenient charging. Its power output will be dependent on the grid connections and power available at your premises. It charges at:

> Up to 7.4 kW[†] on single-phase grid connections.

Most UK homes operate on a single-phase grid connection, however, NewMotion will be able to confirm your power availability and options available.

[†]Power output depends on various factors, such as local rules and regulations, the type of vehicle, the mains connection at your location and the electricity consumption of your building.
^{*}Retail customers only. Subject to eligibility. NewMotion Home Fast Smart charge point per eVito or eSprinter, up to a maximum of 25 eVitos or eSprinters per customer/business. NewMotion Home Fast Smart charge point price includes standard installation and £350 OZEV grant discount. Offer ends June 2021. For full terms and conditions, visit <https://bit.ly/2DIAIt0>

> What is the charging time for my new van?

The table below outlines indicative eVito and eSprinter charging times when using NewMotion's Home Fast Smart charge point overnight, when maximum energy is more likely to be available.

	Battery size	Charging time (7 kW)
eVito	41 kW h (35 kW h useable) [^]	6 hours
eSprinter	55kWh (47kWh useable) ^{^^}	8 hours

[^]While the installed eVito battery capacity is 41 kW h, to protect and prolong the battery life-cycle, 35 kW h is the maximum capacity useable.
^{^^}While the installed eSprinter battery capacity is 55 kW h, to protect and prolong the battery life-cycle, 47 kW h is the maximum capacity useable.

> What are the benefits of a Smart Charger?

• OZEV grant eligible

The UK Government mandates that a smart charger must be installed in order to be eligible for the OZEV (Office for Zero Emissions Vehicles) home charging grant. This scheme makes smart chargers a more affordable solution when compared to a non-smart charger.

• Compatible with multiple vehicles

NewMotion smart chargers can be used with both electric cars and vans.

• Access to real-time charging insights

Get charging related data insights, including kWh power usage, costs and CO₂ savings through an online NewMotion platform and check the live status of any charging session.

• 24/7 remote assistance

Get support around-the-clock from NewMotion's customer care team. All NewMotion charge points are online-connected with issues usually resolved quickly and remotely.

• Easy on-the-go charging

A free charge card for linking to your NewMotion account is provided for use across Europe, making public charging payments simple.

• Automatic payment reimbursement**

Automatically get your electricity costs for charging reimbursed by your employer.

• Dynamic Power Management**

Advanced smart chargers ensure available energy capacity from your home connection is distributed in the best way possible.

**Features not included with the NewMotion Home Fast Smart charge point. They are available on the NewMotion Home Advanced unit which is an optional upgrade.

> Who are NewMotion?

With a network of more than 150,000 charge points in over 35 countries, award-winning charging specialists NewMotion empower people around the world to go electric.

They're experts in designing and installing smart solutions for business charging, home charging and charging on the move – and we've been working with them since 2018 to electrify our entire Dealer Network.

What are the next steps?

The 7 easy steps to getting your free Home Fast Smart charge point set up with NewMotion.

1. Customer consent

First, you'll need to give your consent for our eReady specialist to share your details with NewMotion. Once you confirm, the paperwork will be completed on your behalf.

2. NewMotion introduction

A NewMotion expert will get in touch within 48 hours of enquiring to discuss individual home charger needs and check OZEV grant eligibility.†

3. Overview of agreed offering

You'll receive a breakdown with all of the details of your chosen smart charging point, including any upgrades agreed with NewMotion.

4. Offer processed

Once you are happy with the proposed product and service offering, NewMotion will process it for you.

5. Installation scheduled

A date for your charge point installation is usually agreed within 2-4 weeks.*

6. Pre-installation check

This will be carried out to confirm exactly where you want your Home Fast Smart charge point to be located.

7. Installation and demonstration

Once your Home Fast Smart charge point has been installed, NewMotion will provide a demonstration of how it works.

Mercedes-Benz

*Some may fall outside of NewMotion's standard installation, in which case they will tailor the quote to your needs.
