

StreamSpace L-cab with level floor.

Exterior width [mm]	2300
Exterior length [mm]	2300
Headroom on engine tunnel [mm]	1970
Headroom in front of seats [mm]	1840

The 2300 mm wide StreamSpace cab is designed for applications involving one driver in national long-distance haulage. As an option it is available with a level floor throughout, giving it a headroom* of 1970 mm. With over 100 litres more capacity and 70 litres more stowage capacity than its predecessor, it offers an ideal blend of aerodynamics and living comfort in national long-distance transport.

StreamSpace cab helps ensure considerably less consumption due to its low wind resistance. A wide range of additional equipment is optionally available for the StreamSpace cab with level floor – to add individuality and comfort to the working/living areas.
