Mercedes PRO connect – FREE for 2 years*

Every eVito comes with Mercedes PRO connect, the most powerful integrated van monitoring system on the market – included free as standard, for the first 2 years. Send job and navigation details direct to the driver's phone and you monitor the van's performance, charging levels and security status via an app on your phone, tablet and laptop – to give you:

› More safety

- **Accident recovery and roadside assistance** summons a MobiloVan technician if required*.
- **MB Emergency Call System automatically calls the emergency services** in the event of a severe accident.

› More security

- **Theft warning alerts, geo-fencing and GPS tracking.** Receive alerts straight to your mobile, making it easier to recover lost or missing eVitos.
- **Remote locking** enables drivers to check the status of, and lock and unlock, each door.
- **See each vehicle's location in real-time** – follow your drivers' progress on the live map.

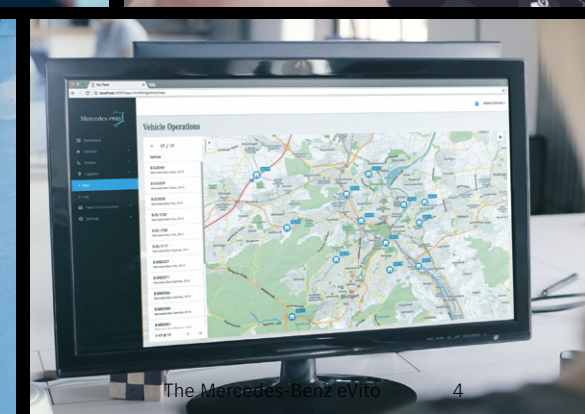

› More efficiency

- **Real-time updates on critical parts** – sent to you and your preferred Dealer, encouraging proactive maintenance, repair and servicing.
- **Plan the quickest, most range-efficient journeys** – send route information and updates remotely to drivers, reducing admin time and increasing efficiency.
- **Record trips and see a journey log** to help with mileage claims.
- **Live traffic information** – automatically receive warnings about slippery roads or broken-down vehicles, helping you avoid traffic jams and lengthy tailbacks*.
- **Navigation** – find locations easily using the touchscreen with our geocoded map system and what3words voice navigation†.

Charging options – maximise efficiency and reduce downtime.

› The eVito can be charged via Alternating Current (AC) only.

AC is more cost effective for overnight charging and requires longer intervals to fully charge but uses less energy:

- AC 7.2kW: 0-100% in 6 hours†
- AC 2.3 kWh: 0-100% in 20 hours†.

› Managing range and battery performance.

The eVito uses a process called recuperation that recovers energy when the vehicle is decelerating to help you efficiently manage your vehicle's range. There are 4 recuperation modes available, which can be adjusted via the gearshift paddles. The greater the recuperation, the faster you decelerate and therefore, the more energy your vehicle will regenerate:

- D-** This mode will enable you to get maximum range from your eVito. It has maximum recuperation and fastest deceleration. Due to the deceleration being so strong, your vehicle will automatically activate your brake lights.
-
- D** This mode has less recuperation than D- and has similar deceleration levels to a diesel Vito.
-
- D+** This mode has significantly lower recuperation levels and therefore will decelerate at a slower rate than a diesel Vito.
-
- D++** This is a coasting mode, meaning your vehicle will have no deceleration and will significantly reduce your vehicle's range.

Free Smart Charge Point available*

We'll install a NewMotion Home Fast Smart charge point at your home for smart, safe and convenient charging.

† Charging times are subject to the power available at the location where the vehicle will be charged as well as factors such as temperature and type of cable used.

* Subject to eligibility. Terms and conditions apply. Please speak to your preferred eReady Dealer for more information.

All figures are based on a standard specification.

The choice of wheels and transmission may affect CO₂ emissions.

The indicated values were determined according to the prescribed measurement method – Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Figures shown may include options which are not available in the UK. For Battery Electric Vehicles (BEV) figures determined with battery fully charged. These models require mains electricity for charging. Figures shown are for comparability purposes; only compare with other vans tested to the same technical procedures. Figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, factory-fitted options, accessories fitted (post registration), variations in weather, driving styles and vehicle load. Further information about the test used to establish fuel consumption and CO₂ figures can be found at <http://www.mercedes-benz.co.uk/WLTP>

The EQ Ready App.

Are you #eReady?

We know that not every business is ready to go electric – but if you want to find out whether it's right for you, the EQ Ready app is here to help. Take a free virtual test drive and analyse your electric driving potential using your current van, with no obligation and no pressure to make the switch.

- Easily simulate electric driving in your current van.
- Analyse your driving distances and behaviours to get a clear picture of your virtual range and the battery capacity you'd need.
- See public charging stations in your area and add private charging points (such as those owned by your employer or family/friends).
- Test your hypothetical battery's consumption at different temperature scenarios, and experiment with load weights for a realistic and detailed assessment.
- Get set up in seconds by downloading the app on Apple or Android now.

After care.

Keeping Businesses Moving.

The support we provide doesn't end once you've driven away. We offer a number of ways to keep your business moving long into the future.

› Free roadside assistance

The Mercedes-Benz eVito comes with MobiloVan, our comprehensive roadside assistance cover, available for 24/7 for up to 30 years*. If you misfuel, lose your keys, are involved in a road traffic accident, or if your van is vandalised or won't start, we'll send out a trained technician. With an average roadside repair rate of 80%, you'll be moving again in no time.
